## **CDC** Coalition

November 24, 2020

The Honorable Nita Lowey Chairwoman House Appropriations Committee Washington, DC 20515

The Honorable Richard Shelby Chairman Senate Appropriations Committee Washington, DC 20510 The Honorable Kay Granger Ranking Member House Appropriations Committee Washington, DC 20515

The Honorable Patrick Leahy Vice Chair Senate Appropriations Committee Washington, DC 20510

Dear Chairwoman Lowey, Chairman Shelby, Vice Chair Leahy and Ranking Member Granger:

As you work to finalize the FY 2021 Labor, Health and Human Services, Education, and Related Agencies Appropriations bill, the undersigned members of the CDC Coalition and other supporting organizations urge you to support at least the House level of \$7.926 billion for the Centers for Disease Control and Prevention's programs in any final FY 2021 spending package and to oppose any efforts to reduce or eliminate funding for any of CDC's critical programs. We also urge you to provide additional emergency supplemental funding to ensure our federal, state and local health departments and agencies have the resources they need to protect the public from the ongoing COVID-19 pandemic, including adequate resources for vaccine allocation, distribution and administration.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators and citizens served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases. From playing a leading role in aiding in the surveillance, detection and prevention of the COVID-19 pandemic both globally and in the U.S. to playing a lead role in the control of Ebola in West Africa and the Democratic Republic of the Congo to monitoring, investigating and helping to control the recent measles outbreaks in the U.S., to pandemic flu preparedness, CDC is the nation's – and the world's – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and international partners rely on CDC for accurate information, direction and resources to ensure they continue to be prepared in a crisis or outbreak.

In addition to playing a leading role in protecting the public's health from COVID-19, CDC is faced with many other unprecedented challenges and responsibilities ranging from combating the opioid, tobacco, vaping and obesity epidemics to emergency preparedness and chronic disease

prevention. CDC funds programs for injury control and violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease and other chronic diseases; tobacco prevention and control; nutrition and physical activity; immunizations; HIV, STI and hepatitis prevention; prevention of vector-borne diseases; environmental health, including the prevention of childhood lead poisoning; oral health; reducing health disparities; preventing infant mortality and birth defects; preventing antimicrobial resistance; preventing prescription drug overdose; improving the health and quality of life of individuals with disabilities; Alzheimer's disease prevention and awareness; vision and eye health and public health research and health statistics. It is notable that more than 70 percent of CDC's budget supports public health and prevention activities by state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs have been woefully underfunded. We urge you to support a funding level of at least \$7.926 billion for CDC's programs in any final FY 2021 spending bill and to provide additional emergency supplemental funding needed to protect the public from the ongoing COVID-19 pandemic, including adequate resources for vaccine allocation, distribution and administration.

Please contact Don Hoppert at <u>donald.hoppert@apha.org</u> or 202-777-2514 with any questions regarding our request.

Sincerely,
