The Honorable Buffy Wicks
 Appropriations Committee
 1021 O Street, Suite 8220
 Sacramento, CA 95814

Re: JOINT LETTER OF SUPPORT SB 68 – ADDE– Menjivar

Dear Chairwoman Wicks,

On behalf of the undersigned organizations, medical professionals, California restaurants, California residents, and online community leaders, we strongly support SB 68, Allergen Disclosure for Dining Experiences (ADDE). We believe that this bill will

improve food safety for millions of Californians with food allergies by requiring restaurants to document the top 9 allergens in a written format. The bill allows for flexibility in the format of disclosure, including an online option or on main menus, allergen charts, allergen menus, allergen chalkboards, or other similar formats.

An estimated 2.5 million California residents live with food allergies.¹² Exposure to allergens can lead to severe reactions, including anaphylaxis and, in some cases, death. Because food allergies have no treatment beyond strict avoidance, access to clear allergen information is critical. While federal laws have made it easier for individuals to avoid allergens in packaged foods, the labeling of restaurant food remains a significant gap in consumer safety.³

In fact, dining in restaurants represents the highest risk setting for food allergy reactions. Nearly 50% of reported fatal food allergy reactions are a result of food consumed from a restaurant or food establishment, and 75% of all food allergy reactions occur in a restaurant setting.⁴ Without menu disclosures and food-allergy trained staff, individuals with allergies must rely on verbal assurances from staff and spend significant amounts of time researching safe places to dine.⁵

More than half of parents of children with food allergies (53%) that AAFA surveyed in a regular patient study reported that they have left a restaurant in the middle of dining as a result of an allergy, and nearly 90% of parents have avoided certain restaurants altogether due to their child's allergy.⁶ Surveyed parents communicated the need for greater availability of information about the contents of restaurant meals and asked regulators to prioritize better food labeling inside restaurants.⁷ SB 68 (ADDE) would

provide this critical transparency, making it easier for consumers to make safe choices and reducing the risk of life-threatening reactions.

Allergen disclosures take up minimal space on a menu and serve a vital public health function by helping consumers avoid potentially fatal allergic reactions.⁸ Countries around the world already require restaurants to disclose allergens.⁹ Many have already drawn parallels between the EU allergen restaurant labeling laws and the potential for states to improve allergen labeling laws in restaurants.¹⁰ SB 68 offers California the chance to adopt a similar, common-sense approach to protect the millions of residents managing food allergies.

By enacting SB 68, California would position itself as a leader in food allergy protections, setting a critical example for other states to follow. We urge the legislature to pass SB 68 into law and take an important step toward preventing needless allergic reactions and deaths.

Sincerely,

Kenny Mendez
